RECEIVED

NOV 12 1997

PATENT EXENSION
AND PARTS

Dear Mr. Kunin:

This is in regard to the application for patent term extension for U.S. Patent No. 4,427,663 filed by Merck & Co., Inc. under 35 U.S.C. § 156. The animal drug product identified in the patent extension application is IVOMEC EPRINEX Pour-On for Beef and Dairy Cattle (), which was assigned New Animal Drug Application (NADA) No. 141-079.

A review of the Food and Drug Administration's official records indicates that this product was subject to a regulatory review period before its commercial marketing or use, as required under 35 U.S.C. § 156(a)(4). Our records also indicate that it represents the first permitted commercial marketing or use of the product, as defined under 35 U.S.C. § 156(f)(1), and interpreted by the courts in Glaxo Operations UK Ltd. v. Quigg, 706 F. Supp 1224 (E.D. Va. 1989), aff'd, 894 F. 2d 392 (Fed. Cir. 1990).

The NADA was approved on April 16, 1997, which makes the submission of the patent term extension application on June 12, 1997, timely within the meaning of 35 U.S.C. § 156(d)(1).

Should you conclude that the subject patent is eligible for patent term extension, please advise us accordingly. As required by 35 U.S.C. § 156(d)(2)(A) we will then determine the applicable regulatory review period, publish the determination in the Federal Register, and notify you of our determination.

Please let me know if we can be of further assistance.

Sincerely,

Ronald L. Wilson
